Specifications

Item	Description
Sound source	2 master sound sources Solo preset : Monophonic system Orchestra preset: 8-note polyphonic system
Keyboard	61 keys (C2 ~ C7; 5 octaves)
	Mode Accompanyment Melody
	Key split FULL 0 61
	Key split 1 Left 19 Right 42
	Key split 2 Left 24 Right 37
Solo synthe. preset	<div> <div> Trumpet Guitar Solo keying </div> <div> Pan flute Synthe. tone </div> </div>
Orchestra preset	<div> <div> String ensemble Piano Organ Harpsichord Trumpet Vibraphone </div> <div> Trombone Elec. piano Jazz organ Hawaiian guitar Clarinet Jazz flute </div> </div>
Accompanyment tone	Accomp. strings Bass
Effect	Magic foot (Sustain, Bend, Full-in), Presence control, Sustain lever (Base, Orchestra), Ultra-chord (Open, Off, Close), Stereo/Ensemble switch, Tremolo, Sustain switches
Stereo pan pot mixer	Pan pot: (1. Base, 2. Accomp./Arpeggio, 3. Strings, 4. Orchestra, 5. Solo synthe./Mic.) Mixer: (1. Autorhythm, 2. Base, 3. Accomp. 4. Arpeggio, 5. Accomp. strings, 6. Orchestra, 7. Solo synthe.)

Item	Description
Auto-rhythm	Rhythms: 14 patterns, Stereo rhythm Waltz, Samba, Polka/March, Bossanova, Rumba, Tango, Disco, Rock I, Rock'n roll, Legae, Swing, Rock II, Slow rock, Shaffle Rhythm tempo, Synchro-start, Intro. & Fill-in, Start & Stop Tact Beat conductor (4 LEDs) Tempo range ♩ = 45 ~ 280
Fascinating chord	Normal, One-finger, Multi-finger, Chord memory Accomp. (Piano/Guitar), Arpeggio variation (3), Base variation (1, 2, 3, Auto-variation), Key split, Key transpause
Compu-corder	Record (Chord/Base), Replay, 3 musics selector (up to 62 bars)
Other controls	Power switch, Total volume control, Solo synthe. pitch control (Solo pitch) Orchestra pitch control (Main pitch)
External	Expression pedal terminal Mic terminal (w/volume): -60 dB AUX OUT (Stereo pin jack): -6 dB Magic foot terminal (Magic foot is an accessory.) Headphone terminal
Max. output	4 W + 4 W (AC) 2.5 W + 2.5 W (DC)
Power source	AC 240/220/110 V, 50/60 Hz DC 12 V (SUM1 cell x 8 - not provided) (Car battery - with CN332 adaptor*)
Power consumption	29 W (Switch ON) 1.8 W (Switch OFF)
Battery life	3 hours approx. (continuous operation/max. vol.)
Speaker	φ 14 cm x 2
Other	Battery warning light (Power LED)
Dimensions	950 mm(W) x 99 mm(H) x 330 mm(D)
Weight	9.3 kg (without batteries)
Finish	2-tone color (Black & white) with plastic case

Safety Precaution

1. Make sure to use the specified parts for those marked with \triangle symbol.
2. Return the clamp near the power supply to original position after servicing.
3. Disconnect the power before removing connectors of various units and circuit boards.
4. **IMPORTANT:** (Model KB-500B only)

The wires in the mains lead (power cord) are coloured in accordance with the following code:

Green-and-Yellow	: Earth
Blue	: Neutral
Brown	: Live

The wire which is coloured Green-and-Yellow must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol \perp or coloured green or green-and-yellow.

The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured blue or black.

The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured brown or red.

Features

- Variegated auto-accompaniment system by adopting the multi-functional microcomputer system.
- Compucorder memorizing chord and bases of 62 bars of 3 musics
- Key split switches over the accompaniment keyboard from a range to another.
- Easy transposing by use of the key transpose function.
- Stereophonic auto-rhythm.
- Pan pot mixer helps to make right and left sound images differently and free.
- Magic foot controls three kinds of effects.
- Solo synthe. presets and orchestra presets in the two master sound source system
- Solo synthe. presets with solo keying function thank to a quasi-synthesizer circuit system.
- Orchestra presets of 8-note polyphonic system

Main Parts Location

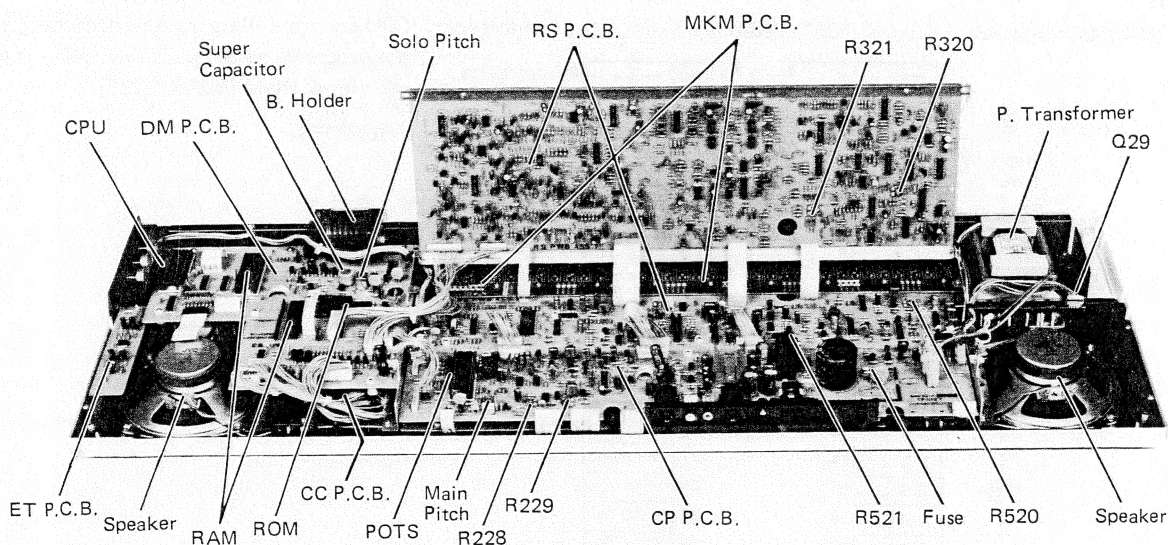

Fig. 1

Outline of Microcomputer in This Keyboard

1. Main functions of microcomputers

- Keying of orchestra presets (including sound source dividing function)
- Sound source dividing for solo presets
- Fascinating chord
- Auto-rhythm
- Selecting of presets and effects
- compucorder
- Key transpose
- Ultrachord
- Key split
- Turning on and off of LEDs

2. Block diagram

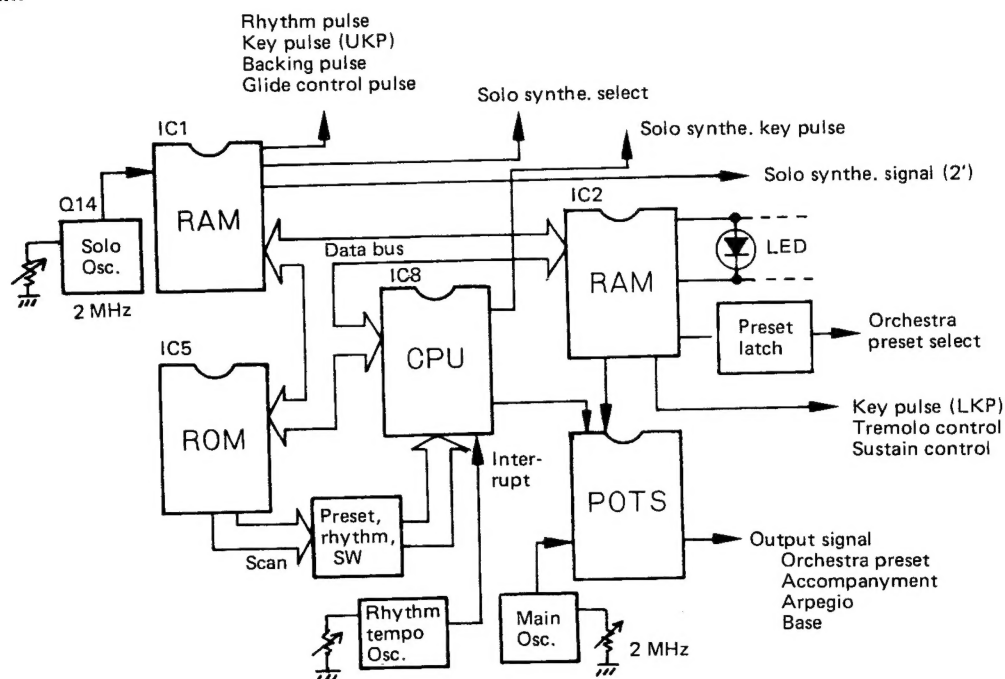

Fig. 2

3. IC terminals

- CPU MSM80C49-40RS (2 K bites ROM, 128 bites RAM, 8-bit 1-chip type) CPU controls all operations according to the programs of the built-in ROM and an additional ROM (MSM83C55).

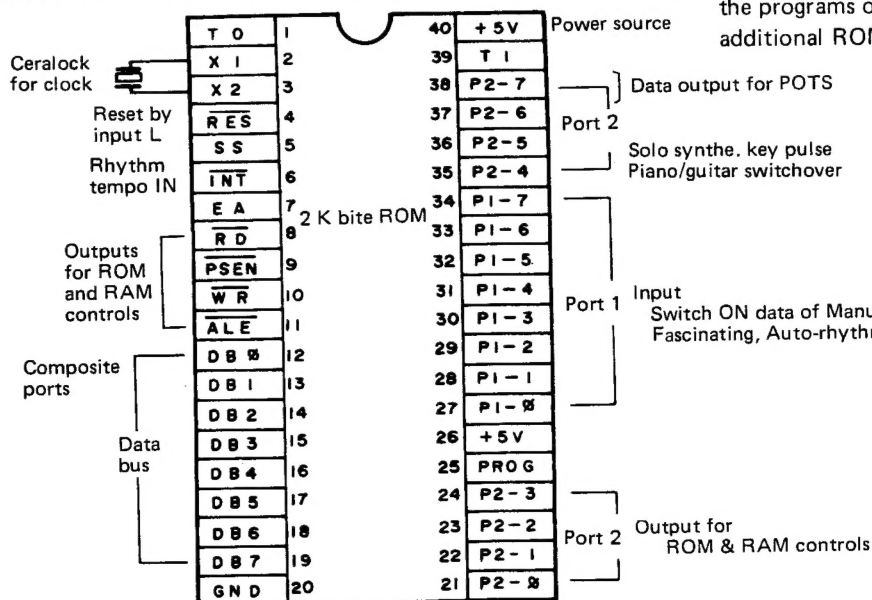

Fig. 3

Microcomputer scanning block diagram

The 14-bit binary code turned out from ports A and B of ROM (MSM83C55) scans every switch and enters into port 1 of CPU through the buffer, and CPU outputs various kinds of commands according to the information input.

Fig. 4

■ ROM (MSM83055-18RS)

ROM memorizes all the program and also receives switching informations.

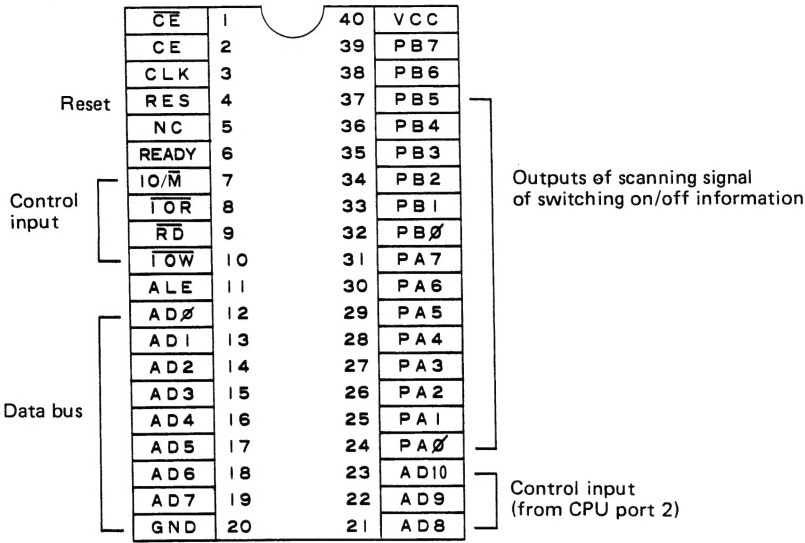

Fig. 5

■ RAM (MSM81C55RS)

RAM memorizes codes by CPU's control. IC1 outputs the sound source of the solo presets, rhythm pulse, key pulse and signals for switching solo presets. IC2 turns out signals for POTS data, switching of orchestra presets, turning on LEDs, etc.

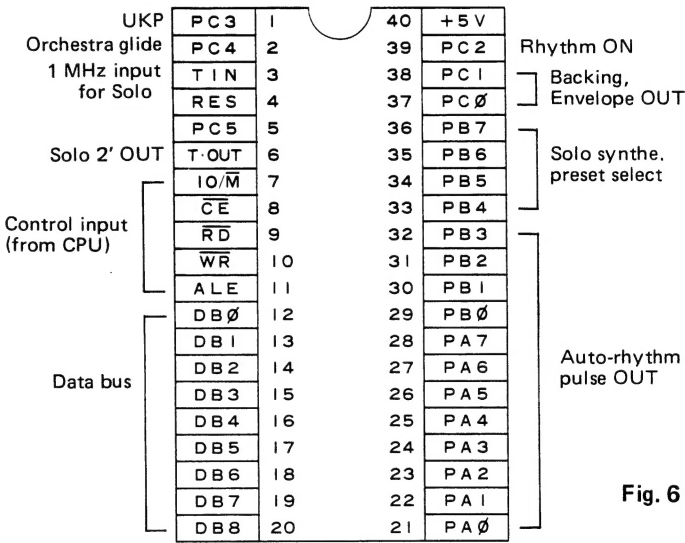

Fig. 6

IC2

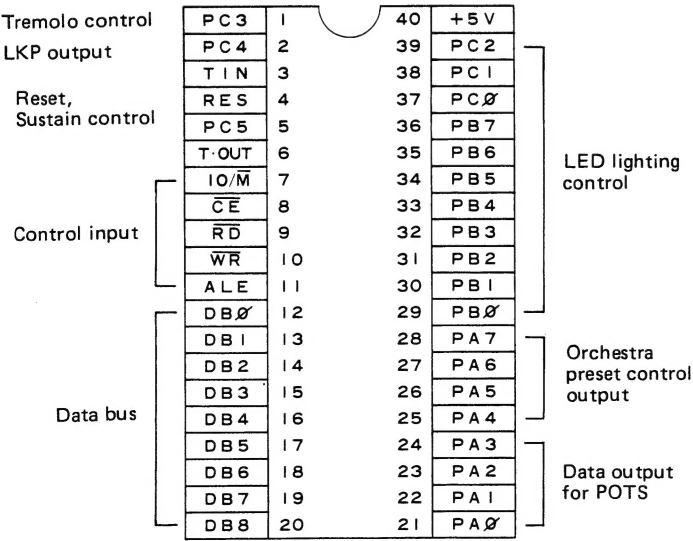

Fig. 7

- POTS (VC4050B)

POTS is an LSI which generates the upper, lower and pedal tones (functions of dividing, keying, waveform conversion) in 1-chip, and its operation is done with digital 6-bit data sent from IC2 (ROM).

Terminals

Programmable organ tone synthesizer VC4050B

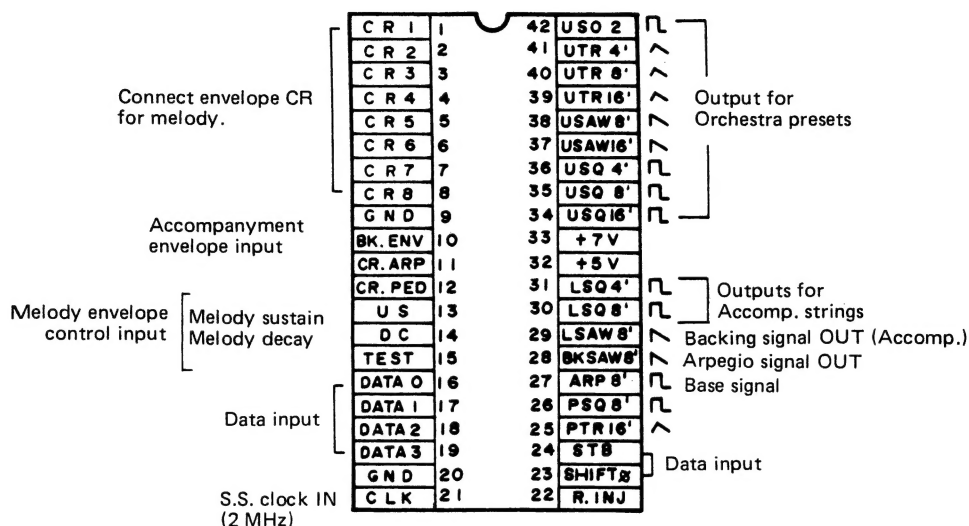

Fig. 8

- Internal block diagram

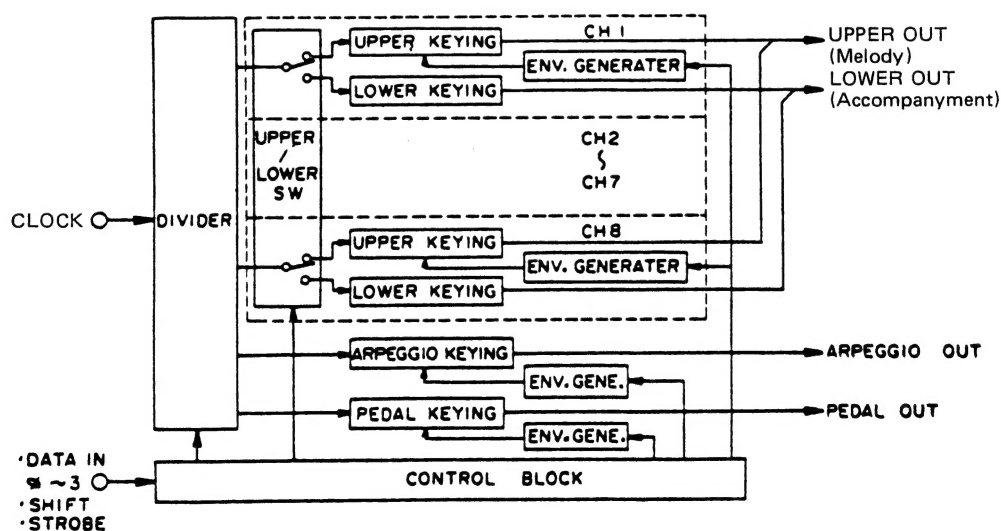

Fig. 9

Disassembly

1. Removal of the base cover

- 1) Remove the battery cover first, then take out batteries.
- 2) Remove 10 tapping screws A .
- 3) Remove 4 screws with washers B .
- 4) Remove 2 tapping screws C .
- 5) Remove the cover taking special care.

Fig. 10

2. Checking up voltages on the PC board

- In case of checking up almost all parts of boards except a part of the CP board, remove 4 screws fixing the RS board as shown in Fig. 1.
- When checking up the innermost part of the CP board, remove the board, transformer and battery holder first.

Fig. 11

Note: When re-assembling the boards and parts removed once, take great care not to make a mistake in applying screws. Screws for plastics have larger pitches while smaller pitches for steel goods.

3. Removal of volume control knobs and switch knobs

- 1) Knobs of volume controls can be removed by pulling outwards.
- 2) To remove switch knobs place the board as shown in Fig. 11 and push out them with a minus screwdriver or the like through the square hole of the board. When fitting knobs again, take care about colors of knobs. (Refer to page 19.)

4. Removal of PC board

Refer to Fig. 11. Remove 10 screws fixing switches in the hole of the CP board and 4 screws fastening the board. Slide volume control knobs can be removed by pulling the board upwards.

5. Removal of manual keys

- 1) After completion of the above item 4, remove 8 screws fastening the key chassis to remove the chassis.

- 2) Removal of key

Depressing the point C of the figure pull it in the direction of D to remove.

When removing a black key, first remove two white keys next to it and remove the black key in the same manner as for white keys.

Fig. 12

Fig. 13

6. Removal of the music stand (smoked cover)

Remove screws inside (see Fig. 14), and push the cover holder with a screwdriver and the like in the direction of the arrow mark (removal on one side only). After that stand the cover and it will be removed easily.

Fig. 14

Adjustment

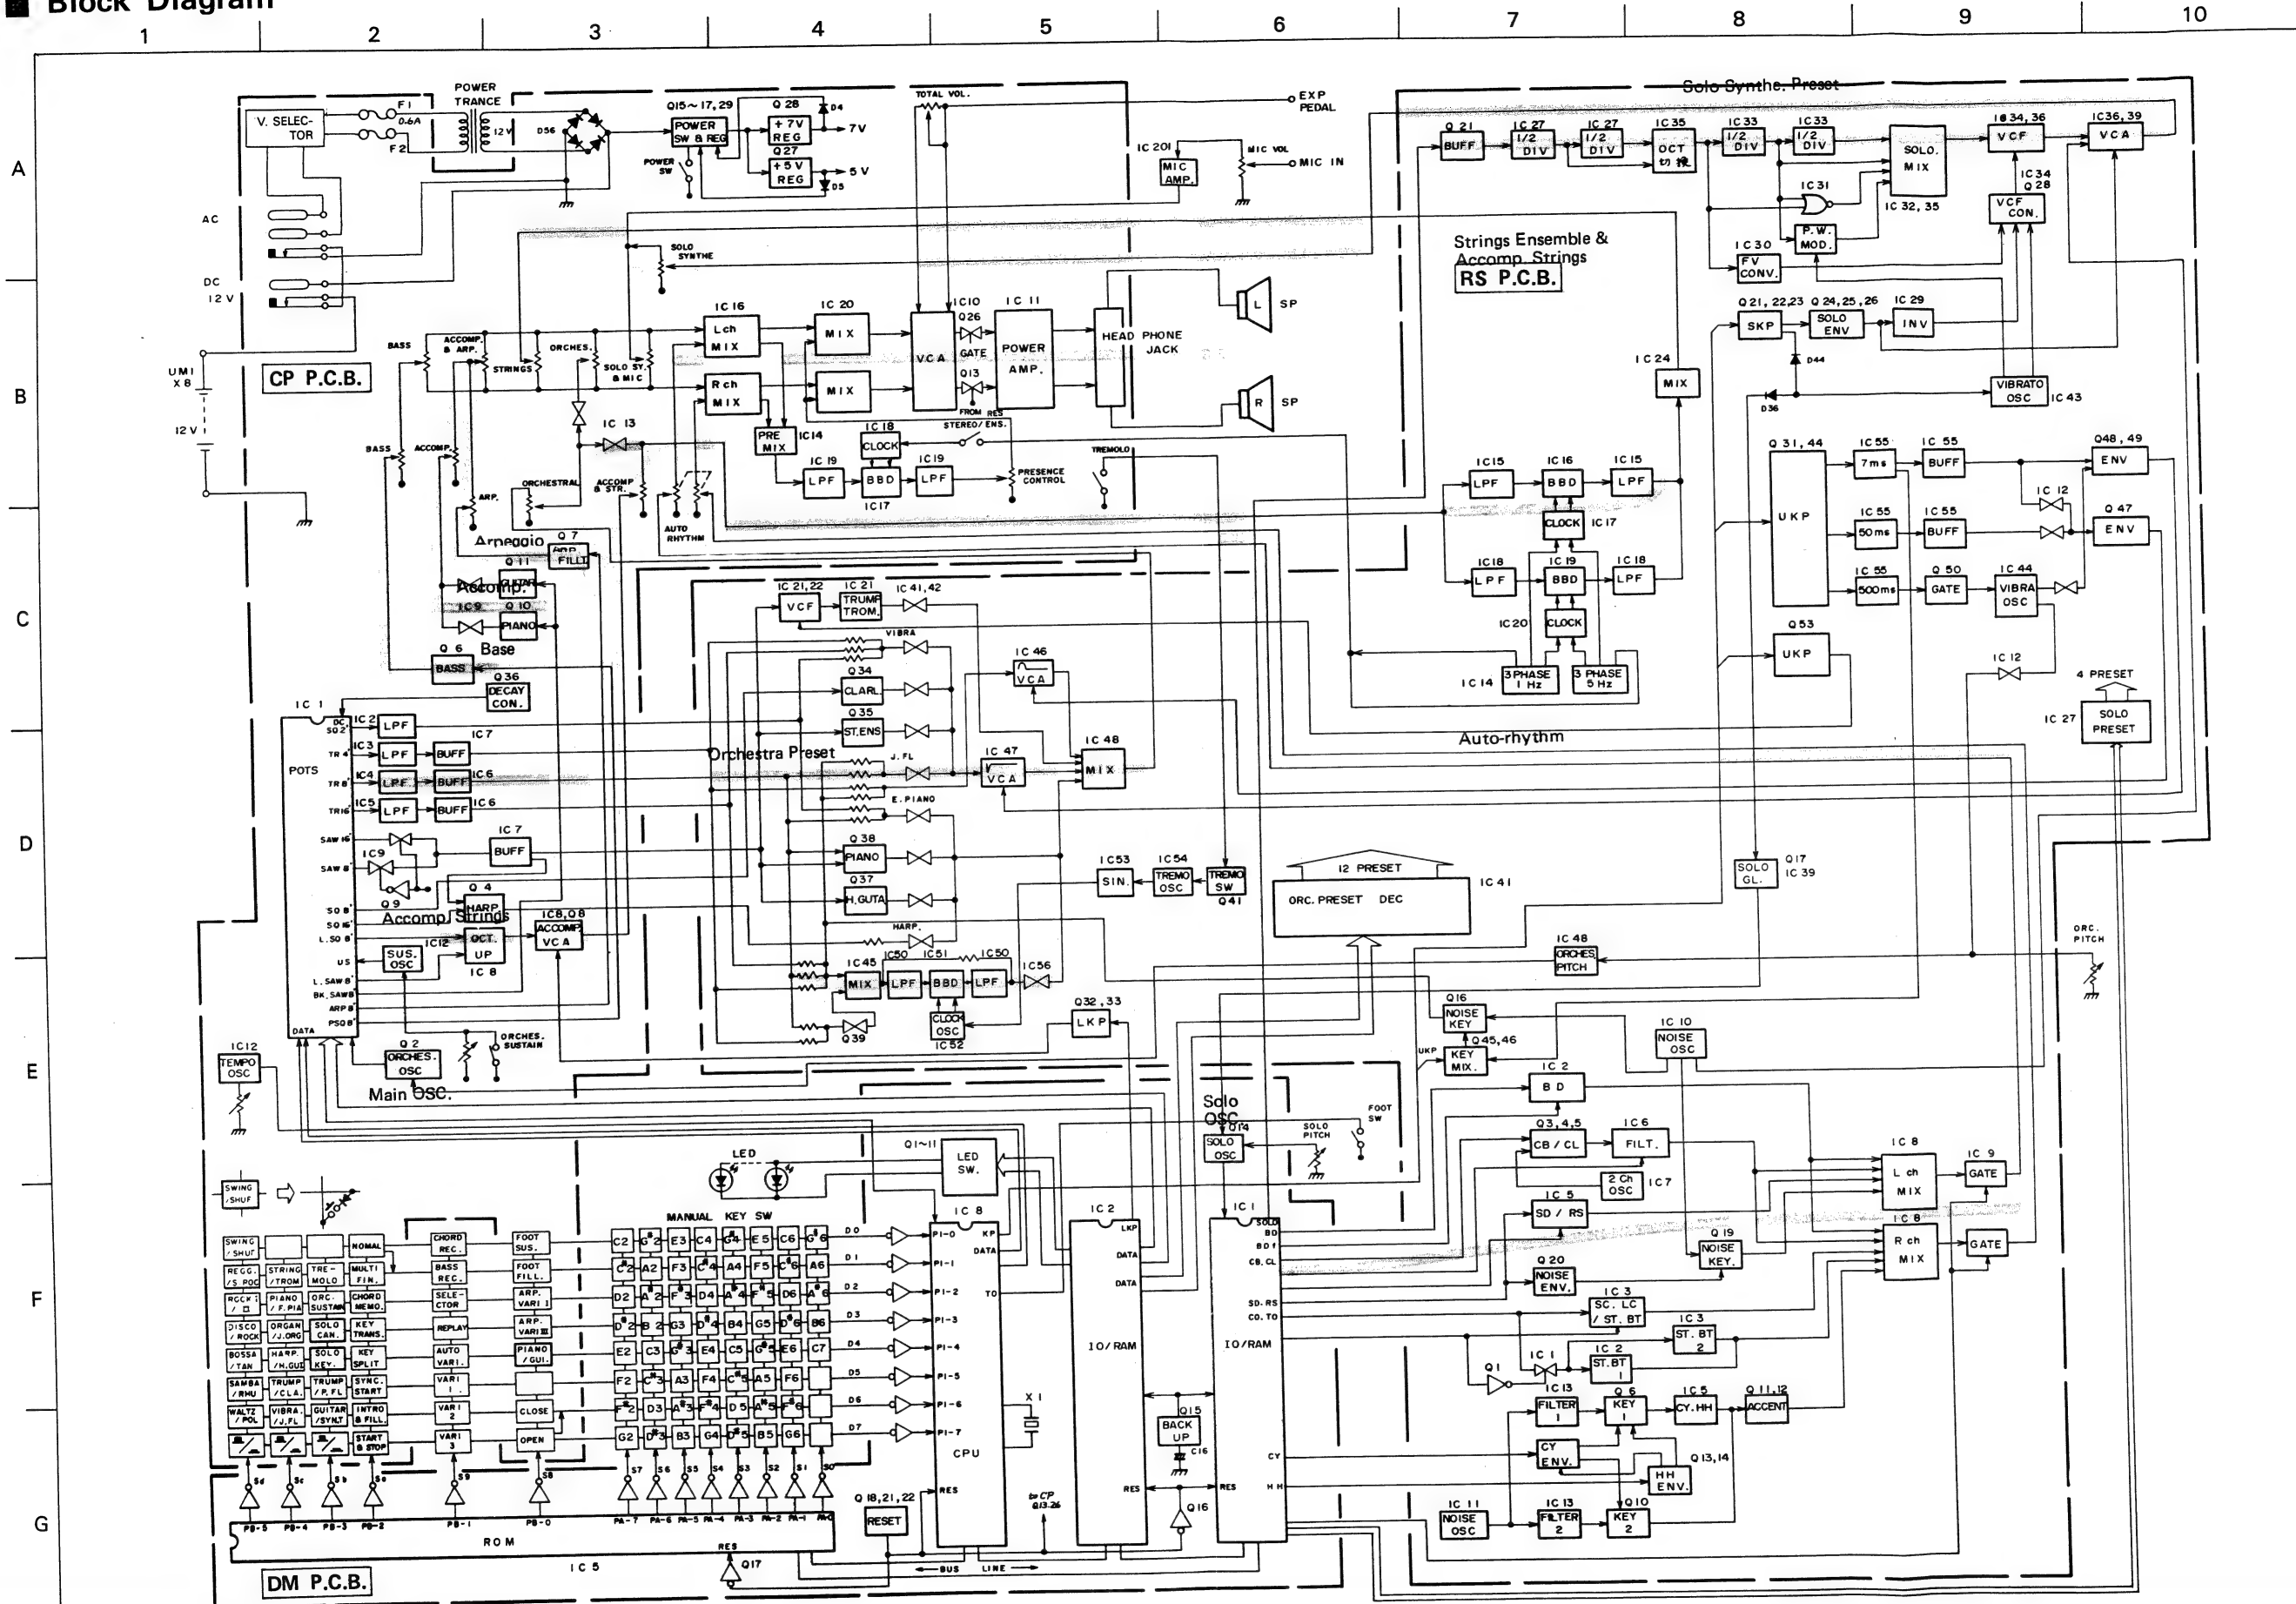

Adjustments should be performed in the order of the numbers.

No.	Item	Measuring device	Adjusting point	Measuring point	Conditions	Adjusting Method
1	Main oscillator frequency (Organ)	Frequency counter	CP Board L1 coil	R17	Orchestra preset: Organ Orchestra volume: MAX. Main pitch: Center	Depressing A6 key (highest La) turn the coil L1 so that the frequency becomes 7072 Hz.
2	Solo oscillator frequency (Solo, Synthe.)	By ear	DM Board L1 coil		Solo preset: Pan flute Solo volume: Center Orchestra preset: Organ Orchestra volume: Center Solo pitch: Center	Depressing a key as your option and hearing sound, adjust L1 so that the sound becomes zero beat.
3	Accomp. strings envelope	Oscilloscope	CP Board R229	R45	Key split: 1 Accomp. string: MAX.	Turning ON and OFF C3 key repeatedly adjust R229 to obtain the following value. $A : B = 2 : 1$ 
4	Accomp. strings signal	Oscilloscope	CP Board R228	R27	Key split: 1 Accomp. string: MAX.	Turning ON A2 key adjust R228 so that C is equal to D. 
5	Tremolo speed	Frequency counter	RS Board R521	Junction of R446 & R447	Tremolo SW: ON	Adjust R521 for 6.6 Hz.
6	Brass VCF cutoff	Oscilloscope or AC valve voltmeter	RS Board R520	AUX OUT L-ch	Orchestra preset: Trombone Orchestra volume: MAX.	Turn R520 counterclockwise to open VCF and turn C4 key ON, too, to measure the value of level. Then turning C6 key ON in the same condition, adjust R520 to obtain the same value as the former.
7	Solo VCF cutoff frequency	Oscilloscope or AC valve voltmeter	RS Board R321	AUX OUT L-ch	Solo preset: Pan flute Solo volume: MAX.	Turn R320 fully counterclockwise (continuous sound can be heard even in key OFF condition, then turn R321 counterclockwise (VCF open). Turn E2 key ON and measure value of the level. Then, holding C6 key turned ON, adjust R321 to obtain the same value as the former.
8	Solo VCA cutoff level	Oscilloscope	RS Board R320	AUX OUT L-ch	Solo preset: Pan flute Solo volume: MAX.	Turning on A6 key repeatedly, adjust R320 to obtain the following value. $E : F = 2 : 1$
